JEC Innovation Programme 2006

The JEC Group created its JEC Composites Innovation Programme in 1998. The programme gives out awards to the most innovative composite solutions in the following categories: **Aeronautics & Space, Construction, Ground Transport, Energy & Industry, Sports & Leisure,** and two new categories this year, **Environment and Process.**

Innovation Winner in the Process Category

F3P-RTM process for an eight-panel, Class A application for the Aston Martin DB9, developed by **Ford Motor Company** (United-States), **Aston Martin** (United-Kingdom), and **Sotira** (France).

Alain Prost is seen presenting the award to:

Jean Py, Sotira

Carl Johnson, Ford

Ken Kendall, AML
